DETAILED ACTION

Allowable Subject Matter

Claims 15-19 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 15 states the limitations that each of the first, second, third, fourth, fifth, and sixth conductive tracks are generally round. Although generally round conductive tracks are known in the Prior Art (e.g. US 2001/0040051 A1), there is no motivation to combine such a teaching with the invention of US 6,847,274 (Salmela). The invention of Salmela specifically requires that the conductive tracks be strip shaped to provide shielding all along the length of the transmission line (1, figure 1). Thus, modifying the strip shaped tracks (2) to be generally round would eliminate this essential feature of the invention of Salmela. This would destroy the reference. Thus one of ordinary skill in the art would have no motivation to make such a modification. Additionally, there was no other combination of Prior Art found that teaches or suggests the claimed invention to the ordinarily skilled artisan. Hence, these limitations, in conjunction with the other claimed features, were neither found to be disclosed in nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2001/0040051 A1, granted to Lipponen, discloses circular tracks, each connected to multiple vias.
